

HINGE PRO™

- This revolutionary tool eliminates the tedious task of marking out and chiseling recesses on doors and door frames.
- The precision engineered blade will complete recesses for up to 100 doors before it needs to be sharpened.
- The Hinge Pro is suitable for all softwood and most hardwood applications.
- The Hard Cap handle is designed to protect the hands of the user, optimize cutting force and durability, while reducing vibration and noise. The striking surface is two and a half times larger and eliminates flying chips and mushrooming, significantly improving the safety performance of the tool.

HINGE PRO™

Safety Notice: The Hinge Pro is a high quality precision tool. Always wear safety goggles when using this tool. When not in use, please ensure that the blade guard is in place. It is recommended to wear safety boots at all times when using the Hingepro.

Instructions

1

Mark door

The Hinge Pro's u-shaped blade aligns with a single mark, no need to draw around hinge.

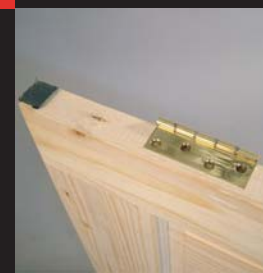

4

Indent made

The specially engineered blade will ensure precision every time.

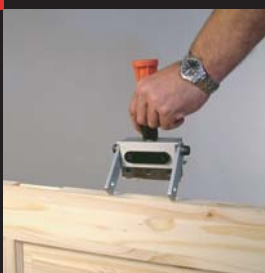

7

Fit hinge

Sizes available:
Standard 75mm
Standard 100mm

2

Adjust side guides

Sit the two arms on door and push the Hinge Pro down.

5

Align & strike

Align blade accurately with indent and ensure side guides are held firmly against door. Gently strike the tool to create the recess.

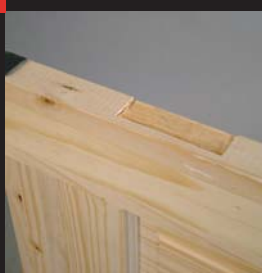

3

Strike tool

Strike tool so that the blade penetrates the wood.

6

Recess made

Recess is accurate and perfect every time.

Easily complete one hinge recess in under 30 seconds!
